(54) Title: TARGET INTERCEPTION

(57) Abstract: A projectile deployment system for use in a intercepting target (32) wherein the system includes a body (10) defining a body axis, and a number of barrels (30) circumferentially spaced around the body axis. Each of the barrels (30) contains a number of projectiles (31) axially stacked therein, with a corresponding number of charges being provided such that each charge is associated with a respective projectile (31) along barrel (30). Each of the charges is individually activated to deploy a respective projectile (31) in response to a signal from a controller.

PCT/AU2003/001034

A. CLASSIFICATION OF SUBJECT MATTER

Int. Cl. 7: F42B 12/60; F41H 11/02; F41F 1/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

AU: IPC F41F 1/00; F41G 7/00, 7/20; F41H 11/02; F41B 12/32, 12/36, 12/60

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

DWPI: Q79/DC with keywords such as intercept, missile, projectile, pattern and similar terms.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/AU2003/001034

Box I Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos :

because they relate to subject matter not required to be searched by this Authority, namely:

2. ☐ Claims Nos :

because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos :

because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)

Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

1. Claims 1-33, 36-39, 48, 49 directed to various projectile deployment systems, methods of manufacturing projectile deployment systems and methods of intercepting targets wherein each of the systems and methods are characterised by including a body having a number of barrels with each barrel including an array of axially stacked projectiles and associated propellant charges; and
2. Claims 34, 35, 40-47 directed to various methods and apparatus for intercepting a target wherein each of the methods and apparatus are characterised by including a body with a number of projectile systems wherein each projectile system deploys a number of projectiles in a predetermined direction. There is no restriction that each of the projectile systems comprises a barrel including an axial array of projectiles and associated charges.

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims

2. ☒ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.

3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

☐ The additional search fees were accompanied by the applicant's protest.

☐ No protest accompanied the payment of additional search fees.
